Mosby's Fluids & Electrolytes Memory NoteCards: Visual, Mnemonic, And Memory Aids For Nurses, 2e

Synopsis

Completely portable, this pocket-sized collection of full-color, spiral-bound cards uses humor, cartoons, and mnemonics to help you understand and retain important information about fluids and electrolytes. This fun, colorful, and insightful approach makes these cards a valuable learning and review tool throughout nursing school, as well as a great resource for preparing for the NCLEX® examination. UNIQUE! 64 full-color, cartoon mnemonics cover key fluids and electrolytes and acid-base concepts. UNIQUE! Colored highlights draw attention to four central topics: Serious Life Threatening Implications in pink; Common Clinical Findings in blue; Important Nursing Implications in yellow; and Patient Teaching information in green. Concise What You Need to Know information on the back of each image highlights key information and specific nursing implications. Spiral-bound pages made of thick, substantial card stock are durable and portable. Color-coded thumb tabs feature a different color for each section for easy referral. 15 new cartoons help you master the latest information on fluids and electrolytes. New topics include: Homeostasis: A Question of Balance and The Bodyâ™s Water: Keeping It Where You Need It.

These are great little note cards all in a binder to take with you on the go. They are very helpful when trying to learn fluid and electrolytes. Knowing F & E is extremely important for any practice and if you are like me and need more than just textbook, then these notecards are worth the purchase.

This booklet has been Excellent resource for the students to better understand the Fluid and Electrolytes. I would recommend this booklet especially if some students are have difficulty comprehending the topic at hand.

I own several of these and I love them. However, this particular one seriously need proof reading. There are mistakes in it e.g. one error said $1L = 1LB = 2.2KG$.I still use it as it has some good mnemonics.

I wish I had this product before my Fluids and Electrolytes exam. It would have helped me retain more informations i needed for the test. Another way of preparing(that I should have done) for the test is also writing down the symptoms on flashcards and write down the type of hypo-/hyper-(electrolyte) conditions for which symptoms. Or write down the specific symptom/s that only occurs in a specific electrolyte condition.---Arlyn, ct

I have this e-book and the Fluids & Electrolytes. Both are very helpful as a supplemental aid to my school textbooks.

Wonderful notecards. I used it for my recent Fluid & Electrolytes test and I was able to remember what the cards said by the pictures. Honestly one of my favorite notecards out there. I have two quarters left of nursing school and I am certain that I will keep on using this!

Really love these cards. They have helped me in OB, Pharm, and Fund. Great illustrations, and mnemonics, easy to read and follow and on the back of the pics they have nurse interventions and considerations listed! Only wish I had one for every subject!

It arrived on time. Thank you I'll use it as a reference for my nursing class. I think it's really nice to have as a student. It's so colorful and I think it's good! because I remember the information faster with colors and illustrations. I like that it's very handy. I can bring it everywhere.I gave it 4 stars because I still need to look at my other BIG nursing books for complete information... But other than that, it's a good one!Hope this helps!
