The Northwest Green Home Primer

Synopsis

The essential, real-world, green home manual Everyone can make green home decisions on a budget with this inspiring, informationpacked guide. Whether you are building, remodeling, buying, or just curious, here are real-world strategies for getting the greenest results from your budget, with hundreds of ideas for a home that is built to last, comfortable and healthy, money- and time-saving in the long term, and kind to the planet. From your home's exterior to its operating systems within, from siting to interior design, this is the basic training that has given many the confidence to proceed. Award-winning sustainable design and building consultant and teacher Kathleen O'Brien and architectural designer and sustainability consultant Kathleen Smith offer their "top picks" for each phase. They've also each faced their own green home challenges in a single-family house and a duplex, and other case studies show affordable energy-efficient green homes both old and new. Brimming with ideas, clear and logical, with tips, checklists, and resources for green home planning, construction, remodeling, and maintenance, extensively illustrated with photos and diagrams, this is the essential green home manual for novice and professional alike.

Customer Reviews

From the first chapter I knew I was reading something special. O'Brien and Smith take the time to tell us exactly why building and remodeling in more sustainable and environmentally-friendly manner are not only important to reduce our imprint on the animals and resources of our lovely planet but also our responsibility to our native history and our current and future everyday lives.

Boom! Totally sucked in! Their dedication to teaching the reader - at minimum - enough to ask the right questions, providing solid resources for digging deeper into issues that are relevant to each reader, and the constant mantra about early planning leading to the best results is amazing. I think those new to green building as well as seasoned folk will find this book to be a great collective resource. Major kudos to O'Brien and Smith and all those that contributed to such a fabulous product.

The Northwest Green Home Primer is the perfect blend of text, pictures, and graphics. It is easy to read and one can glean information quickly on almost every page through the use of bullet points, tips, and charts. It is packed full of region-specific information for build/design professionals, home owners, and renters who want to help create a socially just and environmentally sustainable future. This unique green guide offers something for everyone including those just beginning the process and those who have already made lots of changes. I believe it can help anyone confidently move forward in their journey to live a more eco-friendly life. I intend to use it personally and professionally.

O'Brien and Smith's The Northwest Green Home Primer is a timely, comprehensive manual, certain to inform and inspire. From initial conception and planning through construction, commissioning and disassembly, the well-illustrated primer walks you through all stages of a green building project, helping you navigate this exciting, dynamic, important design process. It includes an introduction to modern green technologies and practices, up-close and personal case studies, and detailed checklists to ensure that your methodology is complete. If you're building or remodelling a home, The Northwest Green Home Primer will be an indispensable partner, giving you the knowledge and confidence to do it green.

I found the information relevant to getting my certification as a Sustainable Building Advisor. I know it is referred to in Oregon and Washington.
