I really like the designs presented in this book. The actual designs are not only creative, but provide great starting points for personal embellishment. The instructions are clearly stated with drawings that actually are clearly drawn and make sense. I have had many hours just happily making these friendship bracelets and my only problem to date is what to do with them all?! Love it.

I bought this for my nieces to share for Christmas and they loved it. They've made bunches of bracelets for friends and family members and even made some anklets and necklaces. I bought a large thing of embroidery thread to go with it so they would have plenty of choices in colors to create with. Absolutely perfect for beginner crafty kids and appropriate for either boys or girls.

I would say that this book is more suited for a 10 or 12 year old girl who would appreciate the different designs that can be made. Got this gift for my 7 year old granddaughter who loves to craft. Thought she would take to making friendship bracelets as her mother had when she was this age. The concept of just making a friendship bracelet escapes her at this age. Give her a few years & she will be ready to throw out that rainbow loom.

My tween daughter loves to make woven bracelets. We originally found this at our local library and then decided she wanted her own copy b/c there were so many neat ideas.

The bracelets are really pretty but I still haven't found the directions to create the secure finish on the end--I've needed to come up with my own ideas and will probably need a clipboard for the 6 or more strand bracelets. I would have liked to make more. Tried to show my 13 y o neighbor how to make one of the patterns. She gave up and just braided hers.

I don't know much about this craft, so my review is not that inclusive. The book has good suggestions for a beginner, I would like to find more wild designs with feathers, fabric, and fringe, shells, and stones, and dangly bits. I don't know if friendship bracelets include such things. I would like to do more with fabric other than leather or hemp and I would like to re-purpose materials The designs are basic and a good start. I like to be a little more wild and inventive, but that's just me. I gave it a 5 since I have not found anything better. This book gave me the incentive to get creative. It's a good jumping off point. For instance, I ended up making stranded bracelets, and for some reason the book inspired me to make a snake bracelet out of memory wire. I know this book is not about creations like that, but it did give me the desire to go off in a new direction.

Love this book. It has everything I need to make different designs. It also saved me money cause I was looking for a book on hemp designs and this book has it.

This is a fantastic book. So many projects. As art director for a summer camp program, this is a

must in my library!
